DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 73-75 are rejected under 35 U.S.C. 102(e) as being anticipated by Chien et al. (U.S. Patent No. 6,303,510 B1).

In re claim 73, Chien (Fig. 2) discloses an in-process device, comprising:

A substrate (10); and

A conductive layer (12) over the substrate, the conductive layer being exposed to boron trichloride (column 6, lines 38-46). The limitation, “to reduce an ability of the conductive layer to associate with oxygen’ is a recitation of the intended use of the claimed invention. Terms that simply set forth the intended use, a property inherent in or a function, do not differentiate the claimed composition of these elements from those known to prior art.

Art Unit: 2815

In re claim 74, Chien discloses the device of claim 73, wherein the conductive layer comprises tungsten nitride (column 5, lines 26).

In re claim 75, Chien discloses the device of claim 74, further comprising another conductive layer (14a) formed on the tungsten nitride layer.

Response to Arguments

3. Applicant's arguments with respect to claims 73-75 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Maydan et al. (U.S. Patent No. 6,372,633 B1) and Ye et al. (U.S. Patent No. 6,331,380 B1) discloses similar inventions to the claimed invention.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2815

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
